

B-Style Cellar Doors

Note:
Do NOT measure the existing door

Use the following illustration as a guide to assist you while you take the required measurements listed below. The B-Style door comes with a raised threshold to accommodate higher grade.

Please measure the actual foundation since any old doors will be removed and the new door will mount directly to the foundation and house wall. In addition, it is important to measure in a variety of places in the event that the foundation has cracked and/or shifted.
