

# Crawl Space Doors

## Cellar Doors

**Note:**  
Do NOT measure the existing door

**Use the illustrations above as a guide to assist you while you take the required measurements below.**

Steelway Cellar Doors can change your creepy crawl space into a safe and secure entrance to your basement or cellar.

Please measure the actual foundation since any old doors will be removed and the new door will mount directly to the foundation and house wall. In addition, it is important to measure in a variety of places in the event that the foundation has cracked and/or shifted.
